

BBO EXTRACTION PROCESS – v 1.2.2 using WebApp

The BBO Extractor needs to be downloaded from the Chrome Store. Use Chrome (not e.g. Internet Explorer, firefox etc).

Install BBO Extractor Chrome extension from the [Chrome web store](#). Follow this link and then click on 'Add to Chrome'.

The screenshot shows the BBO Extractor extension page on the Chrome Web Store. The page includes the extension icon (a puzzle piece), the name 'BBO Extractor', the developer 'Offered by: John Goacher', a 5-star rating with 0 reviews, and 84 users. A large button labeled 'Download from Chrome' is prominent. Below the main content, there are tabs for 'Overview', 'Reviews', 'Support', and 'Related'. A smaller window within the page displays a screenshot of a BBO results page showing a list of players and their scores.

Your screen will have the option to Download from Chrome

Once installed this needs not doing again

The names file needs to be created and it must be a TXT file

Open in Wordpad or Notepad and copy and paste from the Excel sheet that prepares it

It must be of the form:

```
#names  
BBOUsername, Firstname, surname, EBU number  
B...
```

And will have one line for each player.

Once the event has finished, the result will appear on the BBO results pages.

<http://webutil.bridgebase.com/v2/tarchive.php?m=h&h=vEBU123456&d=vEBU123456>

where 123456 is the club number.

Going into the boards reveals the number for the event

e.g. 6856-1588249958

You want a window with just the result in it. It's of the format

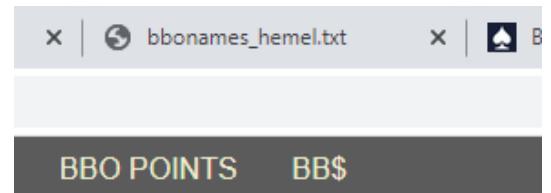

<http://webutil.bridgebase.com/v2/tview.php?t=9262-1588874112>

followed by number e.g.

<http://webutil.bridgebase.com/v2/tview.php?t=7967-1588249958>

This is the required window to run the BBO extractor:

Click on BBX in the top right hand corner:

Tourney 7967-1588249958-

The screenshot shows a browser window with several tabs open. The main content area displays tournament results for event #7967. The results are presented in three sections: 'Honor list (Overall leaders)', 'Section 1 N/S', and 'Section 1 E/W'. Each section contains a table with columns for Rank, Name, Score (%), and Rank Prize. The 'Honor list' table includes rows for Anne Short+CliffShort, Anna Short+CliffShort, joclub+theoceman, augususe+augmarg, Lesley812+Derek1948, ashmon+johnmw74, Eachi+rutkin, rogerjam+Sturm, cmorley+spurs6061, and tanjasun+gjia47. The 'Section 1 N/S' and 'Section 1 E/W' tables show similar data for the respective sections. At the bottom of the browser window, the address bar shows the URL <http://webutil.bridgebase.com/v2/tview.php?t=7967-1588249958>. The browser toolbar includes icons for Back, Forward, Stop, Refresh, and various extensions like 'BBO Extractor' and 'BBOtoXML'.

Every 3 seconds to so, this goes to the travellers or personal scores and extracts the information.

The screenshot shows a Google Chrome browser window with multiple tabs open. The active tab displays the results of a bridge tournament (Tournament 7967) from Hemel Hempstead Bridge Club Online. The results table includes columns for Number, Time, North, South, East, West, Result, Points, Score, Movie, and Traveller. The page also shows the BBO Extractor extension running in the background, indicated by a small box in the top right corner.

BBO Extractor Running Google Chrome Close

And you can see a small box in the right hand corner indicating that it is running. This may take 2 mins or so. Stay on this tab in Chrome.

And when finished:

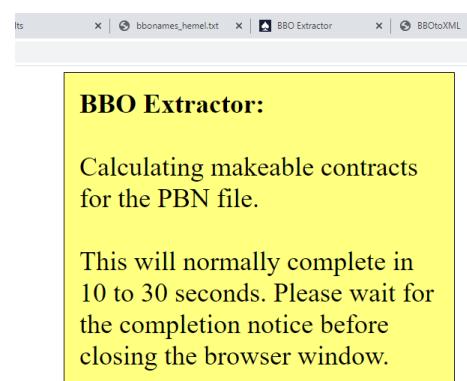

BBO Extractor

Finished - Data will now be downloaded to a csv file in browser Downloads folder. The PBN file will be downloaded when makeable contracts have been calculated.

Prevent this page from creating additional dialogues

OK

Makeable contracts are calculated

These are stored in downloads:

 7967_Pairs_Hemel_Hempstead_Bridge_Club_Online_Duplicate_2020-04-30.pbn
 7967_Pairs_Hemel_Hempstead_Bridge_Club_Online_Duplicate_2020-04-30.csv

Now open the App that creates the XML file: <https://dds.bridgewebs.com/bbotoxml/bbotoxml.htm?p=1>

Enter the name of the club, club number (for a county this is first letter of county e.g. OXF for Oxfordshire)

UMS charge rate:

The charge codes for clubs are 10 if you would like local points and NGS,

11 for no NGS and no MPS and 12 for local points but no NGS. 20 for a county

The master points get completed once you run the screen

Open the text based Username file using Load Names. The number of name in it is shown

The top right button creates the file for P2P

You are required to choose the .csv file created in Downloads.

The XML file is also sent to Downloads and ends with UMS

Then click the button below this for the file to send to BridgeWebs

Again you are required to choose the .csv file created in Downloads.

BBO to XML Converter

Club Name	?????? Bridge Club	X
Club ID Number	123456	
UMS Charge Rate	10	
Contact Name		
Master Points		
North/South		
East/West	<input checked="" type="radio"/> x1 <input type="radio"/> x1.5 <input type="radio"/> x2 <input type="radio"/> x3 <input type="radio"/> x4	

Create XML file This creates an XML file for upload to, EBU/UMS, EBUscore and result websites other than Bridgewebs.

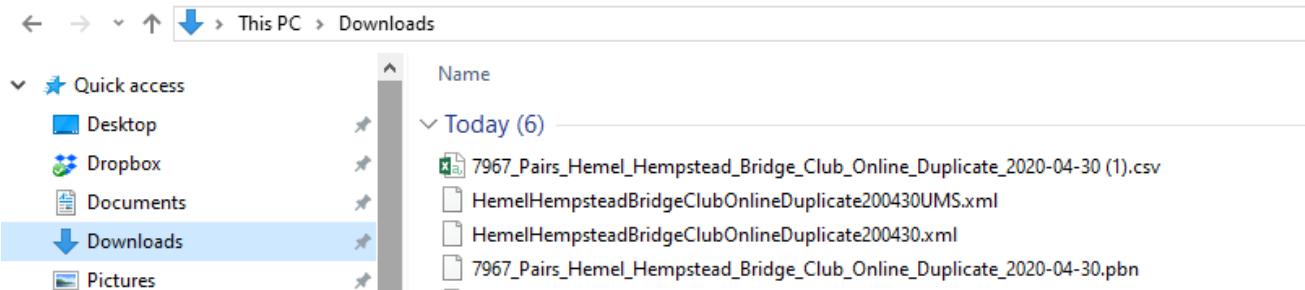

Create XML for Bridgewebs This creates an XML file for upload to Bridgewebs.

Scoring matches BBO
 Enhanced Scoring (Neuberg)

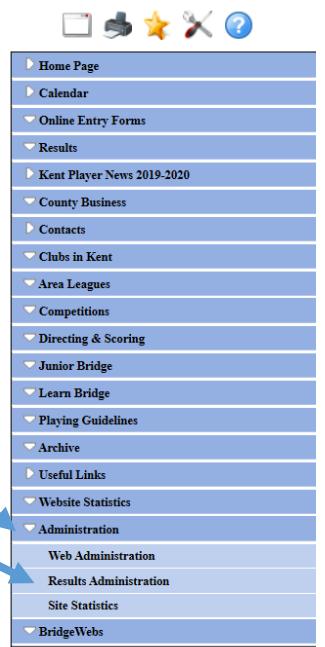

Load Names

Version 1.2.2

The XML file is also sent to Downloads

In BridgeWebs choose Administration.....

And then Results Administration

This screen appears

Upload BBO Online Amend Attach Remove Recover Player

Upload new results or completely replace existing results

This option can be used to: **Upload new results or completely replace existing results.**

As well as the results file, you may wish to add additional files.

Select the Results File:

Select the Bridgemate File (as necessary):

Select the Deal file:

Select the Information File (as necessary):

Delay for Simultaneous Events (if necessary):

This site is built with **BridgeWebs**, the easy web solution.

Choose Select the Results File

By choosing browse and local the XML file recently completed (without UMS in title)

And select the hand, the .pbn file also in download

Nothing else needs completing: and then select upload

Your result are now up. I consider this all done!

Some people like to put up a link to the BBO results, I do not feel this is needed anymore. The link is on:

The screenshot shows the BBOtoXML converter interface. It includes fields for Club Name (Club), Club ID Number (123456), UMS Charge Rate (10), Contact Name, Event Date (2020-06-01), Master Points (9 tables 18 boards), North/South (30,20,10), East/West (30,20,10), and BBO Event Link (<https://webutil.bridgebase.com/v2/tview.php?t=6230-1591036260>). There are two 'Create XML file' buttons: one for external upload and one for Bridgewebs. A blue arrow points from the BBO Event Link field towards the bottom of the page.

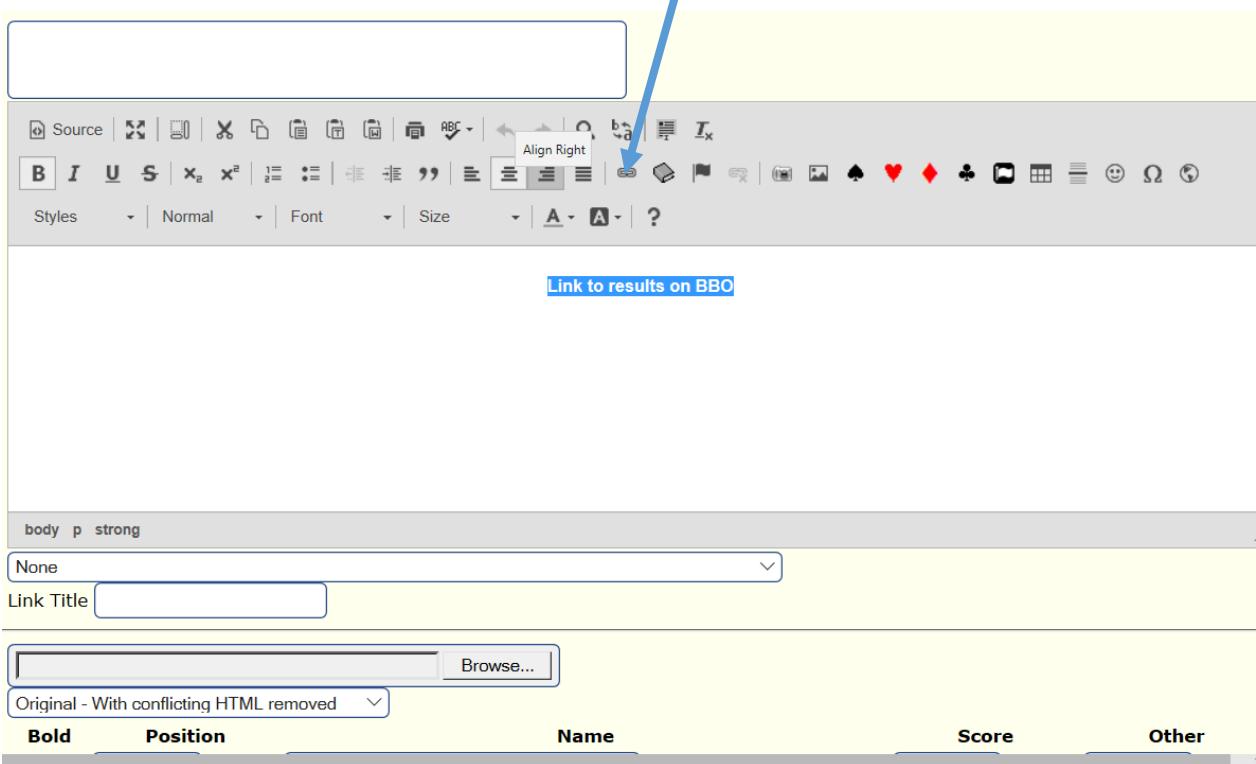

Go into the Calendar item

Scroll down until you get to the information section. Change from Calendar to **Results**

Type 'Link to Results on BBO'

The screenshot shows the 'Information' section of a calendar item. It includes fields for MPTS, Exclude, Handicap, Event Rating, Short Comment (Calendar), Full Comment (Calendar), and a rich text editor. A large red 'X' is drawn across the entire section. Below it, the 'RESULTS SECTION' is visible, containing instructions for uploading results and a table for entering scores.

Highlight this line, and copy the link to the results into this

The pop-up box appears:

Past into URL and click on OK

The official set of instructions from John & Mirna Goacher can be found at: <https://mirgo2.co.uk/bboextractor/>

BBO Extractor

What is BBO Extractor

The term "BBO Extractor" is used for two software components.

1. One is the Chrome extension "BBO Extractor", which extracts the results and hand records from a BBO matchpointed pairs and cross imp pairs tournament. It stores the result as a csv file and PBN file in the browser's Downloads folder. Full ranking, scorecard, and traveller details are extracted as well as BBO bid and play data.
2. A web app BBotoXML is the second software component which is then used to convert the csv file into an xml file suitable for upload to EBU/UMS, EBUScore and BridgeWebs as well as other bridge result websites. Conversion from BBO usernames to real names is carried out if a names file is loaded.

Prepare the BBO user names conversion file. See [BBO User Names File](#)

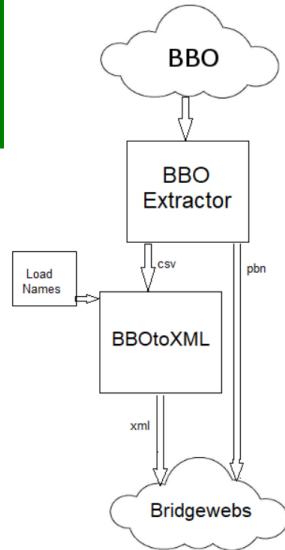

1. Run BBO Extractor. This will produce a result csv file and a pbn file with hand records. See [Extracting from BBO](#) for details.
2. Open the web app BBotoXML.

Start BBotoXML

This will convert the csv file produced by the BBO Extractor to an xml file, optionally translating the BBO user names to their real names. See [BBotoXML Web App](#) for details.

3. Upload the xml file and the pbn file to BridgeWebs. See [Upload to BridgeWebs](#) for details.

How to Use the BBO Extractor - Summary

How to Install the BBO Extractor Software

1. Install BBO Extractor Chrome extension from the [Chrome web store](#). Follow this link and then click on 'Add to Chrome'.
2. The web app BBotoXML doesn't require installation and is available from here by clicking on this button.

Start BBotoXML

Once you start the app you might wish to set a bookmark in your browser.
